

REMARKS

Initially, Applicant wishes to thank the Examiner for the telephone communication conducted July 8, 2005.

The Examiner has rejected claim 29, 37 and 42 under Claims 35 USC § 112 as being indefinite for failing to particularly point out and distinctly claim the subject matter which the applicant regards as the invention. More specifically, the Examiner has objected that the term "user-input" from claims 28 and 37 is similar with "print request" from claim 42.

In response, Applicant has rewritten claims 29 and 37 to recite that there is "a request for a file to be printed embedded in the user-input". Support for this is found in the third sentence of Paragraph 0055 and the second sentence of Paragraph 0057. (Applicant makes such references to paragraph numbers not from the formatting of the specification as filed but from the copy of the specification as published by the USPTO and bearing Publication Number US20020018234. Further references to the specification are also based on the USPTO official publication). Further, the term "for said client" was deleted from claim 37 for clarity.

Applicant respectfully submits that support for the term "print request" as it currently appears in claim 42 is found in Figure 3, and also from the third sentence of Paragraph 0055, and thus the terms in claims 29, 37 and 42 are fully supported.
